

AMENDMENTS

This section presents changes to the specification and the claims in a clean-unmarked format. A version with markings to show the changes made by the current amendment is provided after the remarks section.

In the Specification:

Please insert as the first sentence of the specification:

--This is a continuation of Application Serial No. 09/219,925, filed on December 21, 1998. --

Please replace the paragraph beginning at page 5, line 3 with the paragraph:

-- An electronic device having a display that is capable of concealing a keyboard is disclosed. In a "read mode" the display is visible to a user, but the display conceals the keyboard. This mode allows easy access to data and images via the display. When the display is moved to a "full input/output (I/O) mode", the display is still visible to a user, but the display no longer conceals the keyboard. This mode allows the user to input information via the keyboard as well as view information output from the display. --

Please replace the paragraph beginning at page 5, line 10 with the paragraph:

-- Figure 1 shows a prior art example of an electronic device 10 having a display 20 and maneuver buttons 22. A user is able to view information on the display 20, and the maneuver buttons 22 allow limited input for scrolling through data. The information displayed may compromise pictorial information (images) or textual information (names, appointments, etc.).--
